

TEMPORARY PLATFORMS

CONCRETE KENTLEDGE

CONCRETE SKIPS

Our temporary platforms ('Bailey Bridges') are versatile and quick to erect on site.

They can be built in various lengths of up to 100 feet (30m) and carry a weight of up to 20 tonnes.

Ideal for site investigation works and grouting activities.

We also have a 450 tonne pile test rig, concrete blocks and concrete skips for hire.

MACKENZIE PLANT

ROAD SWEEPING

GULLY CLEANING

MACKENZIE PLANT was established over 30 years ago from the plant department of **MURDOCH MACKENZIE CONSTRUCTION LTD** and has grown from the early days of hiring 22RB cranes to now being Scotland's premier hirer of roadsweepers and gully tankers.

The largest and most modern fleet of roadsweepers and gully tankers in Scotland is operated from our Motherwell Head Office and from our Regional Workshop in Perth. Vehicles are based in various locations throughout Scotland, giving total coverage of the country to every local authority, contractor, and commercial customer.

Our success is based on building lasting partnerships with our customers and our mission is to strive to understand and meet the needs of your business. We aim to provide the best possible and most reliable customer service.

Our equipment is sourced from the best available and we maintain a rigorous programme of vehicle replacement so that the best is always on offer to our customers.

We pride ourselves in our delivery to be where you need us, when you need us.
